Today's meeting we talked about my study history and why I choose to study media design. I declared that it was on my consideration list and I saw that both Infrastructure and Software coursers did not fit me. What's more, I was asked to send a portfolio website which I did not have due to the fact that I was not enrolled in Media in the first semester, we solved this by agreeing to send the very first portfolio website I did last year. Finally, I was asked to think about 3 ideas for a website and submit them in canvas where it's requested.

Very good, Mazoun! After semester 1 you did Instrastucture semester 2, then Software semester 2 (but did not do Web Application Development), and now Media. You had to search for a website you created in semester 1. I am glad you found it! I'll have a look at it.
