Checkpoint 6   FED talk   20-05-2021   😃

AL Habsi, Mazoun M.M.S.   a month ago
on 19th of May we had a meeting for more than 30 minutes. I requested for it because I had an issue with the gltf files, they weren't showing. I got a feedback that says that it don't show due to the privacy reasons there for I need to host the website locally. I was told that I'm on a good track but I was not sure because I was worried. After talking to Mr.Jeroen I got a clear idea of how the final look should be.

Heuvel, Jeroen J.P.A.M.T. van den (Teacher)   a month ago
Yes, you were unsure because you studied threejs, but did not do anything with it in your website. We talked about playing around with the existing examples to gradually adjust them to be more like the way you could make the 3D museum.

Checkpoint 5   FED Personal Learning Plan for Sprint 3   13-04-2021   🙂

AL Habsi, Mazoun M.M.S.   2 months ago
On the 13th of April we had a meeting for 47 minutes. For sprint 3, we talked about future ideas and Personal Learning Plan. I was not sure what to do, I stumbled a cross a wall and run out of ideas. I will not be doing any more hover effects.

A future idea for the website that I will be doing a 3D world with 3D elements or a a 3d museum. I might continue on the last website I made in sprint 2 and make the 3D museum on it, or I could make a new website with a new idea for whatever I like to show on a 3d world.

My PLP this sprint is going to be as the following, at first I will be looking at threejs.org website. I will try to build small elements and their worlds as exercises, they will be stored on a file. Secondly, I will search for YouTube tutorials that shows how to design a 3d world or use a exciting world If I could not understand it directly form the website on the first step. Third, If I stumbled across any issue and I could not solve it after searching for a solution I will be asking Mr. Jeroen on a meeting. Finally, I found this website (https://sketchfab.com/search?sort_by=-relevance&type=models) It allows to install already existing 3D elements.

Heuvel, Jeroen J.P.A.M.T. van den (Teacher)   2 months ago
You showed that you can use Javascript, but that you do not fully understand it. So we looked at possibilities for you to improve. As you showed an interest in 3D effects, it is probably interesting for you to create a 3D world in the browser. It is a good idea to look at existing 3D models that you can use! I would advise you, however, to start out with basic geometrical shapes -like a cube- and explore possibilities from there. Very curious what you will come up with!

Checkpoint 4   FED sprint 2   13-04-2021   🙂

On the 13th of April we had a meeting for 47 minutes. For sprint 2, we talked about the gallery website I made, the PITI research , and my personal learning plan . On the website, we talked about the content, the CSS and JS animations, and some codes. What's more, we discussed about how did I do some pages, why did I do make them the way they were, and what lines of code made this possible.

We talked about the new things I learned in this sprint and how was JS going. I illustrated that the PITI research included information about the 2 sprint, I was told to specify which is on which sprint. I was told to look more in depth on JS codes as I know how to work around with them. Overall Mr. Jeroen was satisfied with my work.

Heuvel, Jeroen J.P.A.M.T. van den (Teacher)   2 months ago
Yes, you actively investigated and applied many interesting topics this sprint! Your PITI-document explains very well the variety of topics that you looked into, what you did, what you learned and how you applied it to the website. Well done!

Checkpoint 3   FED - Personal Learning Plan for sprint 2   25-03-2021   🙂

AL Habsi, Mazoun M.M.S.   2 months ago
We had a meeting on the first of April as I asked for a meeting reschedule. We talked for approximately 30 minutes about what I have done, what I will be doing, and what is my work process is going to be. It was explained that I have to use more JS codes for this phase. I also have to write a PITI report about this phase and explain what I learned, from where I learned it, and the link to the tutorial.

Once more we discussed what website I will be doing because I wasn't yet sure. I decided to make a fully interactive website. I decided to do a gallery website and then link it to my personal portfolio. I was told that it is fine to make many websites for this semester as long as it fits the requirement of the phases.

My personal learning plan is to watch many YouTube tutorials and practice at the same time how to do the codes and to understand them as well. As well to ask and communicate with the teacher when possible. What's more, I will be putting more effort on this development plan because I believe it needs upgrading every now and then.

Heuvel, Jeroen J.P.A.M.T. van den (Teacher)   2 months ago
Yes, Mazoun, you had some trouble. I hope that for sprint 3 you will write you Personal Learning Plan at the beginning of the sprint. Also: please be more detailed. Which resources are you going to study (include urls), and which parts of those resources? And how are you going to show your progress?

Checkpoint 2   FED - sprint 1   16-03-2021   😀

AL Habsi, Mazoun M.M.S.   3 months ago
Today we had a meeting at 1 o'clock, we discussed the first website submit. we talked about the animation, the transection, the transformation within the CSS and using Java Script. I have to decrease the use of ids in the CSS file due to the fact that it could affect the website in the long run. What's more, I have to delete few lines in the responsive website specifications. I should use more JS in future and I was advised to put all the CSS files on a file as well as the JS.

Further more, I have to think about what to make further on website. We discussed many ideas and possibilities for future additional website extension. One of the ideas were I can make a language website as I have interests in many languages, this is considered a good idea due to the fact that I have passion in many languages. Another idea was that I can make a gallery website to display a bunch of photos I have taken and perhaps I can make a " who is the owner of the website" and the user can jump to the website I have right now.

Overall, the website was good but it needs a bit of editing. Jeroen liked that I did researches to do theme change using variables in CSS and JS.

Heuvel, Jeroen J.P.A.M.T. van den (Teacher)   3 months ago
You did well in the first sprint, Mazoun! I really liked the way you researched the theme personalisation and made it work in your website! You also have great content to show & tell! You can improve your website by organising the files into subfolders and making cleverer use of CSS (avoid #id as much as possible) to make your work easier to understand, maintain, and extend. The styling is still very basic - you can make your website more attractive e.g. by using rounded corners, transition effects, etc. But overall you did well. I am looking forward to seeing your work for sprint 2!

Checkpoint 1   09-02-2021

AL Habsi, Mazoun M.M.S.   4 months ago
Today's meeting we talked about my study history and why I choose to study media design. I declared that it was on my consideration list and I saw that both Infrastructure and Software coursers did not fit me. What's more, I was asked to send a portfolio website which I did not have due to the fact that I was not enrolled in Media in the first semester, we solved this by agreeing to send the very first portfolio website I did last year. Finally, I was asked to think about 3 ideas for a website and submit them in canvas where it's requested.

Heuvel, Jeroen J.P.A.M.T. van den (Teacher)   4 months ago
Very good, Mazoun! After semester 1 you did Instrastucture semester 2, then Software semester 2 (but did not do Web Application Development), and now Media. You had to search for a website you created in semester 1. I am glad you found it! I'll have a look at it.
